DETAILED ACTION

Election/Restrictions

Applicant's election of Group I invention (claims 1-12) and further Species A of Figures 1-3 (claims 1-10) in the reply filed on November 15, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claim 1 being a generic claim to all disclosed embodiments.

Claims 11-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 15, 2004.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested:

--Stacked Large-Scale Integrated Circuit (LSI) semiconductor device with miniaturization and thinning of package--.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 2824

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The instant abstract contains approximately 198 words.

Moreover the brief description of the drawings for Figure 21 is missing from the instant specification.

Drawings

Figures 19, 20 and 21 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2824

In claim 3, lines 6-9, the phrase "wherein between the respective bonding pads are suitably arranged" is indefinite because it is unclear what is meant by said phrase. In claim 5, lines 4-6, the phrase "wherein bonding pads out of four sides" is indefinite because it is unclear what is meant by said phrase. In claims 6 and 10, the terms "a rectangular shape" (claim 6, line 3; and claim 10, line 4) incur double inclusion of elements because it is unclear whether said terms refer to same or different "rectangular shape". Further in claim 10, line 7-8, the phrase "and the semiconductor chip corresponding to the bonding leads" is indefinite because it is unclear what is meant by said phrase.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's Admitted Prior Art (hereafter "AAPA"). See Figs. 19-21 and corresponding descriptions thereof in the specification.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

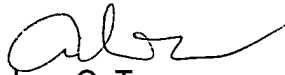

Roesner (US Pat. 4,442,507) describes an electrically programmable read-only memory stacked above a semiconductor substrate.
